About Gensource

Gensource is based in Saskatoon, Saskatchewan and is focused on developing the next potash production facility in that province – but with a radically and fundamentally different approach. Gensource’s President & CEO, Mike Ferguson, P.Eng., has assembled a management and technical team with direct and specific expertise and experience in potash development in Saskatchewan.

Gensource operates under a business plan that has two key components: (1) vertical integration with the market to ensure that all production capacity built is directed, and pre-sold, to a specific market, eliminating market-side risk; and (2) technical innovation which will allow for a small *and* economic potash production facility, which is much friendlier to the environment to construct and operate - the output of which can then be directed to a single, specific market.
