

FINANCIAL STATEMENTS
YEARS ENDED DECEMBER 31, 2019 AND 2018
(EXPRESSED IN CANADIAN DOLLARS)

Independent Auditor's Report

To the Shareholders of Gensource Potash Corporation:

Opinion

We have audited the financial statements of Gensource Potash Corporation (the "Company"), which comprise the statements of financial position as at December 31, 2019 and December 31, 2018, and the statements of operations and comprehensive loss, changes in equity, and cash flows for the years then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as at December 31, 2019 and December 31, 2018, and its financial performance and its cash flows for the years then ended in accordance with International Financial Reporting Standards.

Basis for Opinion

We conducted our audits in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the ethical requirements that are relevant to our audits of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Material Uncertainty Related to Going Concern

We draw attention to Note 1 in the financial statements, which indicates that the Company incurred a net loss of \$2,724,723 for the year ended December 31, 2019 and had an accumulated deficit in the amount of \$25,188,408 as at December 31, 2019. As stated in Note 1, these events or conditions indicate that a material uncertainty exists that may cast significant doubt on the Company's ability to continue as a going concern. Our opinion is not modified in respect of this matter.

Other Information

Management is responsible for the other information. The other information comprises Management's Discussion and Analysis.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audits of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audits or otherwise appears to be materially misstated. We obtained Management's Discussion and Analysis prior to the date of this auditor's report. If, based on the work we have performed on this other information, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audits and significant audit findings, including any significant deficiencies in internal control that we identify during our audits.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

The engagement partner on the audit resulting in this independent auditor's report is Patrycja Anna Kajda.

Gensource Potash Corporation

Notes to Financial Statements

Years Ended December 31, 2019 and 2018

(Expressed in Canadian Dollars)

1. Nature of operations and going concern

Gensource Potash Corporation (the "Company" or "Gensource") is based in Saskatoon, Saskatchewan and is focused on developing resource opportunities with a specific focus on potash development. As is common with many exploration companies, it raises financing for its exploration and development activities. Its registered head office is located at the care of Peterson McVicar LLP, 18 King Street, Suite 902, Toronto, Ontario, M5C 1C4.

These financial statements were authorized and approved by the Board of Directors on March 26, 2020.

The financial statements have been prepared on a going concern basis, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. The Company incurred a net loss for the year ended December 31, 2019 of \$2,724,723 (year ended December 31, 2018 - \$3,148,598) and had an accumulated deficit in the amount of \$25,188,408 at December 31, 2019 (December 31, 2018 - \$22,463,685). These conditions indicate a material uncertainty that may cast significant doubt on the Company's ability to continue as a going concern. The Company is in the exploration stage and is subject to the risks and challenges similar to other companies in a comparable stage of exploration. As at December 31, 2019, the Company had working capital of \$5,616,968 (December 31, 2018 - \$580,436).

The Company's ability to continue operations, as intended, is dependent on its ability to continue to raise adequate financing in order to sustain ongoing expenditures and to explore and evaluate resource properties. The Company has taken additional steps to preserve cash. However, there can be no assurance that the Company will be able to obtain sufficient financing to continue its operations or to recover its exploration and evaluation assets. Accordingly, there exists a material uncertainty that casts significant doubt about the Company's ability to continue as a going concern.

These financial statements do not reflect any adjustments or other changes that may be required should the Company be unable to continue as a going concern. Such adjustments and changes could be material.

2. Summary of significant accounting policies

Statement of compliance

The financial statements of the Company have been prepared in accordance with International Financial Reporting Standards ("IFRS") and their interpretations as issued by the International Accounting Standards Board ("IASB"). The accounting policies set out below have been applied consistently to all periods presented in these financial statements.

Basis of preparation

These financial statements have been prepared on a historical cost basis except for financial instruments measured at fair value. In addition, these financial statements have been prepared using the accrual basis of accounting except for cash flow information. The financial statements are presented in Canadian dollars, which is the Company's functional currency.

Gensource Potash Corporation

Notes to Financial Statements

Years Ended December 31, 2019 and 2018

(Expressed in Canadian Dollars)

2. Summary of significant accounting policies (continued)

Financial instruments

Financial assets

Financial assets are classified as either financial assets at fair value through profit or loss, amortized cost, or fair value through other comprehensive income. The Company determines the classification of its financial assets at initial recognition.

i. Financial assets recorded at fair value through profit or loss ("FVTPL")

Financial assets are classified as fair value through profit or loss if they do not meet the criteria of amortized cost or fair value through other comprehensive income. Gains or losses on these items are recognized in profit or loss.

The Company's marketable securities and also cash are classified as financial assets measured at FVTPL.

ii. Amortized cost

Financial assets are classified as measured at amortized cost if both of the following criteria are met and the financial assets are not designated as at fair value through profit and loss: 1) the object of the Company's business model for these financial assets is to collect their contractual cash flows; and 2) the asset's contractual cash flows represent "solely payments of principal and interest".

Financial liabilities

Financial liabilities are classified as either financial liabilities at fair value through profit or loss or at amortized cost. The Company determines the classification of its financial liabilities at initial recognition.

i. Amortized cost

Financial liabilities are classified as measured at amortized cost unless they fall into one of the following categories: financial liabilities at fair value through profit or loss, financial liabilities that arise when a transfer of a financial asset does not qualify for derecognition, financial guarantee contracts, commitments to provide a loan at a below-market interest rate, or contingent consideration recognized by an acquirer in a business combination.

The Company's amounts payable and other liabilities do not fall into any of the exemptions and are therefore classified as measured at amortized cost.

ii. Financial liabilities recorded fair value through profit or loss ("FVTPL")

Financial liabilities are classified as fair value through profit or loss if they fall into one of the five exemptions detailed above.

Transaction costs

Transaction costs associated with financial instruments, carried at fair value through profit or loss, are expensed as incurred, while transaction costs associated with all other financial instruments are included in the initial carrying amount of the asset or the liability.

Gensource Potash Corporation

Notes to Financial Statements

Years Ended December 31, 2019 and 2018

(Expressed in Canadian Dollars)

2. Summary of significant accounting policies (continued)

Financial instruments (continued)

Subsequent measurement

Instruments classified as FVTPL are measured at fair value with unrealized gains and losses recognized in profit or loss. Instruments classified as amortized cost are measured at amortized cost using the effective interest rate method. Instruments classified as FVOCI are measured at fair value with unrealized gains and losses recognized in other comprehensive income.

Derecognition

The Company derecognizes financial liabilities only when its obligations under the financial liabilities are discharged, cancelled, or expired. The difference between the carrying amount of the financial liability derecognized and the consideration paid and payable, including any non-cash assets transferred or liabilities assumed, is recognized in profit or loss.

Expected Credit Loss Impairment Model

IFRS 9 introduced a single expected credit loss impairment model, which is based on changes in credit quality since initial application.

The Company assumes that the credit risk on a financial asset has increased significantly if it is more than 30 days past due. The Company considers a financial asset to be in default when the borrower is unlikely to pay its credit obligations to the Company in full or when the financial asset is more than 90 days past due.

The carrying amount of a financial asset is written off (either partially or in full) to the extent that there is no realistic prospect of recovery. This is generally the case when the Company determines that the debtor does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off.

Fair value hierarchy and liquidity risk disclosure

The Company classifies fair value measurements using a fair value hierarchy that reflects the significance of inputs used in making the measurements. The fair value hierarchy shall have the following levels: (a) quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1); (b) inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices) (Level 2); and (c) inputs for the asset or liability that are not based on observable market data (unobservable inputs) (Level 3). Please refer to note 14 Financial risk management.

Comprehensive income

Other comprehensive income is a component of shareholders' equity. Comprehensive earnings are composed of the Company's net earnings and other comprehensive income. Other comprehensive income includes unrealized gains and losses on available-for-sale financial assets, foreign currency translation on net investments in self-sustaining foreign operations and changes in the fair market value of derivative instruments designated as cash flow hedges, all net of income taxes.

The Company does not have any other comprehensive income components and, as such, comprehensive income (loss) is equal to net earnings (loss).

Gensource Potash Corporation

Notes to Financial Statements

Years Ended December 31, 2019 and 2018

(Expressed in Canadian Dollars)

2. Summary of significant accounting policies (continued)

Provisions

A provision is recognized if, as a result of a past event, the Company has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation.

A provision for onerous contracts is recognized when the expected benefits to be derived by the Company from a contract are lower than the unavoidable cost of meeting its obligations under the contract. The provision is measured at the present value of the lower of the expected cost of terminating the contract and the expected cost of continuing with the contract. Before a provision is established, the Company recognizes any impairment loss on the assets associated with that contract.

Exploration and evaluation assets

The Company defers the costs of exploration on existing projects and carries them as assets until production commences. Deferred costs include all lease rental payments on project property and executive compensation for fees that relate to exploration activities. Pre-exploration costs are generally expensed unless it is probable that they will generate future economic benefits. The amounts at which exploration and evaluation assets are recorded do not necessarily reflect present or future values. If a project is economically feasible, the related exploration property and deferred exploration costs are amortized over the estimated economic life of the project. If a project has ceased because continuation is not economically feasible, the exploration properties and the exploration and evaluation assets are written off to net recoverable amount.

The Company reviews its evaluation and exploration assets on an annual basis to determine if events or changes in circumstances have transpired which indicate that its carrying value may not be recoverable. The recoverability of costs incurred on the exploration and evaluation assets is dependent upon numerous factors including exploration results, environmental risks, commodity risks, political risks, and the Company's ability to attain profitable production. It is possible that conditions in the near-term could change the Company's assessment of the carrying value. When a project is considered to no longer have commercially viable prospects for the Company, exploration properties and exploration and evaluation assets in respect of that property are assessed as impaired and written off to the statement of operations and comprehensive loss. The Company also assesses exploration properties and exploration and evaluation assets for impairment when other facts and circumstances suggest that the carrying amount of an asset may exceed its recoverable amount.

Once the technical feasibility and commercial viability of extracting a mineral resource has been determined, the property is considered to be a mine under development. Exploration properties and exploration and evaluation assets are tested for impairment before being transferred to development properties.

As the Company currently has no operational income, any incidental revenues earned in connection with exploration activities are applied as a reduction to capitalized exploration costs.

Consideration, in the form of cash and/or shares received under exploration property option agreements or proceeds from the sale of royalty interests, is applied against the acquisition cost of the exploration property and related exploration and evaluation assets. Consideration, in excess of the acquisition cost and related exploration and evaluation on the exploration property, is reported as income for the period and is included as income in the statements of operations and comprehensive loss.

Property, plant and equipment

Property, plant and equipment are recorded at cost less accumulated depreciation. Depreciation is recorded over the estimated useful life of assets on the diminishing balance or straight-line basis using the following rates:

- Furniture and equipment 20%, diminishing balance
- Computer hardware 30%, diminishing balance
- Computer software 100%, diminishing balance
- Leasehold improvements 5 years, straight-line

Gensource Potash Corporation

Notes to Financial Statements

Years Ended December 31, 2019 and 2018

(Expressed in Canadian Dollars)

2. Summary of significant accounting policies (continued)

Leases and right-of-use assets

At inception of a contract, the Company assesses whether a contract is, or contains, a lease. Contracts that convey the right to control the use of an identified asset for a period of time in exchange for consideration are accounted for as leases giving rise to right-of-use assets.

At the commencement date, a right-of-use asset is measured at cost, where cost comprises: (a) the amount of the initial measurement of the lease liability; (b) any lease payments made at or before the commencement date, less any lease incentives received; (c) any initial direct costs incurred by the Company; and (d) an estimate of costs to be incurred by the Company in dismantling and removing the underlying asset, restoring the site on which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease, unless those costs are incurred to produce inventories.

A lease liability is initially measured at the present value of the unpaid lease payments. Subsequently, the Company measures a lease liability by: (a) increasing the carrying amount to reflect interest on the lease liability; (b) reducing the carrying amount to reflect the lease payments made; and (c) remeasuring the carrying amount to reflect any reassessment or lease modifications, or to reflect revised in-substance fixed lease payments. Each lease payment is allocated between repayment of the lease principal and interest. Interest on the lease liability in each period during the lease term is allocated to produce a constant periodic rate of interest on the remaining balance of the lease liability. Except where the costs are included in the carrying amount of another asset, the Company recognizes in profit or loss (a) the interest on a lease liability and (b) variable lease payments not included in the measurement of a lease liability in the period in which the event or condition that triggers those payments occurs. The Company subsequently measures a right-of-use asset at cost less any accumulated depreciation and any accumulated impairment losses; and adjusted for any re-measurement of the lease liability. Right-of-use assets are depreciated over the shorter of the asset's useful life and the lease term.

Share capital

In situations where the Company issues units, the value of the warrants is not separated and is included in share capital in the statements of financial position. Costs associated with the issuance of share capital are netted against share capital.

Flow-through shares

The Company may finance a portion of its exploration activities through the issuance of flow-through shares. Upon the sale of flow-through shares, the Company recognizes a liability for the excess purchase price paid (if any) by the investors over the fair value of common shares without the flow-through feature (the "premium") and records the fair value of the shares in equity. When the tax deduction of the expenditures is renounced to the investor, the liability is reversed and a deferred tax liability is recorded for the amount of the benefits renounced to the investors. To the extent the Company has unrecognized tax benefits from loss carry forwards or other tax pools in excess of book value, the Company will offset the future income tax liability resulting in the premium being recognized in the statements of operations and comprehensive loss.

Revenue recognition

Interest income is recorded on the accrual basis.

Gensource Potash Corporation

Notes to Financial Statements

Years Ended December 31, 2019 and 2018

(Expressed in Canadian Dollars)

2. Summary of significant accounting policies (continued)

Share-based payments

The Company follows guidance provided by IFRS 2, which requires that a fair value based method of accounting be applied to all share-based payments. The fair value of share options granted to employees is recognized as an expense over the vesting period with a corresponding increase in contributed surplus. An individual is classified as an employee when the individual is an employee for legal or tax purposes (direct employee) or provides services similar to those performed by a direct employee, including directors of the Company. For equity-settled share-based payment transactions for non-employees, the Company measures the goods or services received, and the corresponding increase in equity, directly, at the fair value of the goods or services received, unless that fair value cannot be estimated reliably, in which case, the Company measures their value, and the corresponding increase in equity, indirectly, by reference to the fair value of the equity instruments granted.

The fair value is measured at the grant date and recognized over the period during which the options vest. The fair value of the options granted is measured using the Black-Scholes option-pricing model, taking into account the terms and conditions under which the options were granted. At each financial position reporting date, the amount recognized as an expense is adjusted to reflect the actual number of share options that are expected to vest.

Taxes

Income tax on the profit or loss for the periods presented comprises current and deferred tax. Income tax is recognized in profit or loss except to the extent that it relates to items recognized directly in equity, in which case it is recognized in equity.

Current tax expense is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at period end, adjusted for amendments to tax payable with regards to previous years. Current tax assets and current tax liabilities are only offset if a legally enforceable right exists to offset the amounts and the Company intends to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Deferred tax is recognized in respect of all qualifying temporary differences arising between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. The amount of deferred tax provided is based on the expected manner of realization or settlement of the carrying amount of assets and liabilities, using tax rates enacted or substantively enacted at the financial position reporting date.

A deferred tax asset is recognized only to the extent that it is probable that future taxable profits will be available against which the asset can be utilised. To the extent that the Company does not consider it probable that a deferred tax asset will be recovered, such asset is not recognized. Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset tax assets and liabilities and when the deferred tax balances relate to the same taxation authority.

Loss per share

The Company presents basic and diluted loss per share data for its common shares, calculated by dividing the loss attributable to common shareholders of the Company by the weighted average number of common shares outstanding during the year. All outstanding options and warrants were excluded from the calculation of diluted loss per share because their effect was anti-dilutive.

2. Summary of significant accounting policies (continued)

New accounting standard adopted

IFRIC 23 - Uncertainty over Income Tax Treatments

IFRIC 23 clarifies the accounting for uncertainties in income taxes. The interpretation requires the entity to use the most likely amount or the expected value of the tax treatment if it concludes that it is not probable that a particular tax treatment will be accepted. It requires that an entity shall assume a taxation authority with the right to examine any amounts reported to it will examine those amounts and will have full knowledge of all relevant information when doing so.

IFRIC 23 is effective for annual reporting periods beginning on or after January 1, 2019. Earlier application is permitted. The requirements are applied by recognizing the cumulative effect of initially applying them in retained earnings, or in other appropriate components of equity, at the start of the reporting period in which an entity first applies them, without adjusting comparative information. Full retrospective application is permitted, if an entity can do so without using hindsight.

Recent accounting pronouncement

Certain pronouncements were issued by the IASB or the IFRIC that are mandatory for accounting periods commencing on or after January 1, 2019. Many are not applicable or do not have a significant impact to the Company and have been excluded. The following have not yet been adopted and are being evaluated to determine their impact on the Company.

IAS 1 – Presentation of Financial Statements (“IAS 1”) and IAS 8 – Accounting Policies, Changes in Accounting Estimates and Errors (“IAS 8”)

IAS 1 and IAS 8 were amended in October 2018 to refine the definition of materiality and clarify its characteristics. The revised definition focuses on the idea that information is material if omitting, misstating or obscuring it could reasonably be expected to influence decisions that the primary users of general purpose financial statements make on the basis of those financial statements. The amendments are effective for annual reporting periods beginning on or after January 1, 2020. Earlier adoption is permitted. The Company is currently assessing the impact on the financial statements.

3. Critical judgments and accounting estimates

The preparation of the financial statements in conformity with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities and contingent liabilities at the date of the financial statements and reported amounts of revenues and expenses during the reporting period. Estimates and judgments are continuously evaluated and are based on management’s experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Actual outcomes can differ from these estimates. The key sources of judgment and estimation uncertainty that have a significant risk of causing material adjustment to the amounts recognized in the financial statements are:

Exploration and evaluation assets

The application of the Company’s accounting policy for exploration and evaluation assets requires judgment in determining whether it is likely that future economic benefits will flow to the Company, based on assumptions about future events or circumstances. Estimates and assumptions made may change if new information becomes available. If, after an expenditure is capitalized, information becomes available suggesting that the recovery of such expenditure is unlikely, the amount capitalized is written off in the statements of operations and comprehensive loss in the period the new information becomes available.

Gensource Potash Corporation

Notes to Financial Statements

Years Ended December 31, 2019 and 2018

(Expressed in Canadian Dollars)

3. Critical judgments and accounting estimates (continued)

Income taxes and amounts carried forward

Significant judgment is required in determining the provision for income taxes. Provisions for taxes are made using the best estimate of the amount expected to be paid based on a qualitative assessment of all relevant factors. The Company reviews the adequacy of these provisions at the end of the reporting period. However, it is possible that at some future date an additional liability could result from audits by tax authorities. Where the final outcome of these tax-related matters is different from the amounts that were initially recorded, such differences will affect the tax provisions in the period in which such determination is made.

Discount rate on initial recognition

All the components of the lease liability are required to be discounted to reflect the present value of the payments. The discount rate to use is the rate implicit in the lease, unless this cannot readily be determined, in which case the lessee's incremental borrowing rate is used instead. The definition of the lessee's incremental borrowing rate states that the rate should represent what the lessee would have to pay to borrow over a similar term and with similar security, the funds necessary to obtain an asset of similar value to the right-of-use asset in a similar economic environment. Significant judgment is required to estimate an incremental borrowing rate in the context of a right-of-use asset.

4. Exploration and evaluation assets

The Lazlo Project

In January 2013, the Company began the process of acquiring freehold potash leases from private mineral titleholders in area surrounding the town of Craik in central Saskatchewan (the "Lazlo" potash prospect). The Company currently has signed 14 lease agreements covering 6,162.56 acres of freehold subsurface mineral rights in the vicinity of the town of Craik, Saskatchewan. Each of the freehold potash leases grants to the Company the exclusive rights to explore, prospect and remove subsurface minerals for a term of twenty-one years subject to the Crown Royalty rate on potash sold and a \$1.00 per acre annual rental.

The Vanguard Project

The Vanguard Area is located in central Saskatchewan and comprises two mineral leases that have been acquired from Yancoal Canada Resources ("YCR").

On May 18, 2018, the Company entered into a definitive, binding off-take agreement ("Agreement" or "Off-take") with a senior North American agriculture industry leader (the "Off-taker"). The Agreement incorporates the essential elements which are:

- ◆ Purchase of 100% of the production from one "module" of 250,000 tonne/year capacity,
- ◆ A preliminary marketing plan that facilitates Gensource's goal of creating a direct link between a potash producing facility in Saskatchewan and the end user,
- ◆ 10-year term with an option to renew for the life of the project,
- ◆ Right of first refusal for the Off-taker to purchase any additional product that may be produced at the project either through de-bottlenecking or expansion of the productive capacity of the facility,
- ◆ Right of first refusal to purchase the project should Gensource elect to sell any portion of it.

In August 2018, the Company received a determination of "not a development" from the Saskatchewan Ministry of Environment, Environmental Assessment and Stewardship Branch. This allows the Vanguard project to proceed to the detailed construction licensing/permitting process having achieved environmental approval.

Gensource Potash Corporation

Years Ended December 31, 2019 and 2018

(Expressed in Canadian Dollars)

4. Exploration and evaluation assets (continued)

The Vanguard Project (continued)

On May 2, 2019, the Company entered into non-binding Memoranda of Understanding (MOU) to form a joint venture company (“**JVCo**”) to develop the Tugaske Project, “formerly known as Maverick” (the “**Project**”) within the Vanguard Area. The following agreements have been signed for Tugaske Project:

- ◆ **Offtake Agreement:** A non-binding MOU for offtake has been completed with a large and well-respected international fertilizer manufacturing and distribution company. Offtake MOU terms include:
 - Obligation to purchase 100% of the production from one module of 250,000 metric tonnes per year,
 - Typical take or pay offtake provisions,
 - 10-year duration, with option to renew,
 - Product sale and title transfer at the mine site (FCA mine site), and
 - Market-based pricing formula.
- ◆ **Offtaker Project Equity Investment:** A non-binding MOU by the offtaker for direct equity investment into JVCo, alongside Gensource and one other third-party investor. The equity investment will be in the form of cash and equal to 25+% of JVCo ownership.
- ◆ **Third Party Project Equity Investment:** A non-binding MOU for the largest equity investment of about 33% from a third-party investor.

During 2019, the Company closed a royalty sale (“Royalty”) on the Tugaske Project to be developed within Gensource’s Vanguard Area (comprising mineral leases KL244 and KL245). The Company sold two royalties totaling the 2% of gross revenues on the Tugaske Project for US\$6,000,000 (\$7,918,800) and the two purchasers were the Project’s off-taker and a strategic third party investor. The royalty proceeds were applied against the carrying value of the Project.

On October 18, 2019, the Company formally mandated KfW IPEX-Bank GmbH (“KfW IPEX-Bank”) to act as Lead Arranger for the senior debt component (“Debt Facility” or “Facility”) for the Tugaske Project finance package. The Agreement indicates that: (a) KfW IPEX-Bank will be the Lead Arranger to arrange the Debt Facility for the Tugaske Project; (b) A total Debt Facility of approximately US\$180 million is agreed; (c) A significant portion of the Facility is to have Export Credit Agency (ECA) coverage to reduce lender risks and the Project’s interest costs; ECA due diligence will also be overseen and managed by KfW IPEX-Bank; (d) KfW IPEX-Bank will complete its due diligence work, including the in-depth review of technical, environmental, social, market and financial aspects of the project; (e) KfW IPEX-Bank will manage syndication of the Debt Facility and plans to support the Project with a significant take and hold commitment.

8. Share capital

a) Authorized share capital

The Company is authorized to issue an unlimited number of voting and participating common shares. The common shares have no par value and are fully paid.

b) Common shares

At December 31, 2019, the Company had 382,832,935 common shares (December 31, 2018 – 365,757,342) issued and outstanding.

i) On May 31, 2018, the Company completed a non-brokered private financing by issuing 24,999,268 common shares at a price of \$0.125 per share for aggregate gross proceeds of \$3,124,909. As part of the financing, certain officers (the "Insiders") purchased an aggregate of 4,356,000 common shares.

The Company paid commissions to certain finders consisting of cash payments of \$199,760, issued 1,598,080 agent's warrants, exercisable into Common Shares at \$0.125 per agent's warrant for a period of 18 months, and paid legal and other fees of \$17,678. These warrants were assigned a value of \$114,100 using the Black-Scholes valuation model. The underlying weighted average assumptions used in the estimation of fair value in the Black-Scholes valuation model are as follows:

- Risk free rate: 1.87%;
- Expected life: 1.5 years;
- Expected volatility: 89% based on historical 1.5 year trends; and
- Weighted average share price: \$0.15.

Gensource Potash Corporation

Notes to Financial Statements

Years Ended December 31, 2019 and 2018

(Expressed in Canadian Dollars)

8. Share capital (continued)

b) Common shares (continued)

ii) On December 4, 2018, the Company completed a non-brokered private financing by issuing 13,554,494 flow-through shares at a price of \$0.12 per share for aggregate gross proceeds of \$1,626,539. As part of the financing, certain officers (the "Insiders") purchased an aggregate of 833,333 common shares.

As a result of the issuance of flow-through shares, a flow-through premium of \$271,090 was calculated. The current balance of the flow-through premium has been presented as a current liability in the statements of financial position.

The Company paid commissions to certain finders consisting of cash payments of \$74,920, issued 624,332 agent's warrants, exercisable into Common Shares at \$0.12 per agent's warrant for a period of 18 months, and paid legal and other fees of \$14,477. These warrants were assigned a value of \$22,700 using the Black-Scholes valuation model. The underlying weighted average assumptions used in the estimation of fair value in the Black-Scholes valuation model are as follows:

- Risk free rate: 2.10%;
- Expected life: 1.5 years;
- Expected volatility: 88% based on historical 1.5 year trends; and
- Weighted average share price: \$0.10.

iii) On October 11, 2019, the Company closed a non-brokered private placement of 11,230,769 common shares of the Company ("Common Shares") at a price of \$0.13 per Common Share for gross proceeds of \$1,460,000. The Company paid commission to a certain finder consisting of a cash payment of \$58,400, and paid legal and other fees of \$14,754.

c) Warrants

The Company has the following warrants outstanding as a result of equity issues:

	Number of warrants	Weighted average exercise price (\$)
Balance, December 31, 2017	51,507,555	0.14
Issued	3,284,964	0.13
Exercised	(5,911,804)	(0.10)

December 4, 2018	June 4, 2020	\$0.12	624,332
Weighted average exercise price		\$0.12	624,332

9. Stock options

Stock option transactions for the years presented are as follows:

	Number of stock options	Weighted average exercise price (\$)
Balance, December 31, 2017	26,410,607	0.11
Granted ⁽¹⁾⁽²⁾⁽³⁾	6,000,000	0.11
Expired/forfeited	(2,900,000)	(0.11)
Balance, December 31, 2018	29,510,607	0.11
Granted ⁽⁴⁾⁽⁵⁾	11,750,000	0.14
Expired/forfeited	(5,050,000)	(0.11)
Exercised	(4,561,748)	(0.09)
Balance, December 31, 2019	31,648,859	0.12

The weighted average grant date fair value of options granted during the year ended December 31, 2019 was \$0.14 (December 31, 2018 - \$0.11).

⁽¹⁾ On February 2, 2018, the Company granted 4,000,000 options (including 3,500,000 stock options to directors and officers of the Company). The stock options have an exercise price of \$0.09 per share and are exercisable for a period of 5 years. The options vested immediately. The estimated fair value of these options at the grant date was \$306,500 using the Black-Scholes valuation model. During the year ended December 31, 2019, \$nil (year ended December 31, 2018, \$306,500) was expensed. The underlying weighted average assumptions used in the estimation of fair value in the Black-Scholes valuation model are as follows:

- Risk free rate: 2.13%;
- Expected life: 5.0 years;
- Expected volatility: 127% based on historical 5 year trends;
- Forfeiture rate: nil;
- Expected dividend yield: 0%; and
- Weighted average share price: \$0.09.

Gensource Potash Corporation

Notes to Financial Statements

Years Ended December 31, 2019 and 2018

(Expressed in Canadian Dollars)

9. Stock options (continued)

(2) On June 13, 2018, the Company granted 1,000,000 options to a director of the Company. The stock options have an exercise price of \$0.145 per share and are exercisable for a period of 5 years. The options will vest upon the final close of a financing agreement (Corporate or project financing) between Gensource Potash Corporation and any financial institution or parties introduced to Gensource Potash. The estimated fair value of these options at the grant date was \$150,000 using the Black-Scholes valuation model. Due to a revision in management's estimate, these options are not expected to vest and therefore the cumulative expense recognized to date, amounting to \$103,448, has been reversed during the year ended December 31, 2019 (year ended December 31, 2018, \$103,448 was expensed). The underlying weighted average assumptions used in the estimation of fair value in the Black-Scholes valuation model are as follows:

- Risk free rate: 2.14%;
- Expected life: 5.0 years;
- Expected volatility: 123% based on historical 5 year trends;
- Forfeiture rate: nil;
- Expected dividend yield: 0%; and
- Weighted average share price: \$0.15.

(3) On July 19, 2018, the Company granted 1,000,000 options to a director of the Company. The stock options have an exercise price of \$0.145 per share and are exercisable for a period of 5 years. The options vested immediately. The estimated fair value of these options at the grant date was \$145,000 using the Black-Scholes valuation model. During the year ended December 31, 2019, \$nil (year ended December 31, 2018, \$145,000) was expensed. The underlying weighted average assumptions used in the estimation of fair value in the Black-Scholes valuation model are as follows:

- Risk free rate: 2.02%;
- Expected life: 5.0 years;
- Expected volatility: 120% based on historical 5 year trends;
- Forfeiture rate: nil;
- Expected dividend yield: 0%; and
- Weighted average share price: \$0.145.

(4) On February 1, 2019, the Company granted 1,500,000 options to directors of the Company. The stock options have an exercise price of \$0.105 per share and are exercisable for a period of 5 years. The options vested immediately. The estimated fair value of these options at the grant date was \$119,187 using the Black-Scholes valuation model. During the year ended December 31, 2019, \$119,187 was expensed. The underlying weighted average assumptions used in the estimation of fair value in the Black-Scholes valuation model are as follows:

- Risk free rate: 1.86%;
- Expected life: 5.0 years;
- Expected volatility: 112% based on historical 5 year trends;
- Forfeiture rate: nil;
- Expected dividend yield: 0%; and
- Weighted average share price: \$0.10.

Notes to Financial Statements

Years Ended December 31, 2019 and 2018

(Expressed in Canadian Dollars)

9. Stock options (continued)

⁽⁵⁾ On October 24, 2019, the Company granted an aggregate of 10,250,000 stock options (including 8,000,000 stock options to directors and senior officers of the Company) at an exercise price of \$0.14 per share, exercisable for a period of 5 years. The options vested immediately. The estimated fair value of these options at the grant date was \$1,155,264 using the Black-Scholes valuation model. During the year ended December 31, 2019, \$1,155,264 was expensed. The underlying weighted average assumptions used in the estimation of fair value in the Black-Scholes valuation model are as follows:

- Risk free rate: 1.54%;
- Expected life: 5.0 years;
- Expected volatility: 114% based on historical 5 year trends;
- Forfeiture rate: nil;
- Expected dividend yield: 0%; and
- Weighted average share price: \$0.14.

The following table reflects the stock options issued and outstanding as of December 31, 2019:

Expiry date	Exercise price (\$)	Weighted average remaining contractual life (years)	Number of options outstanding	Number of options vested (exercisable)	Number of options unvested

Gensource Potash Corporation

Notes to Financial Statements

Years Ended December 31, 2019 and 2018

(Expressed in Canadian Dollars)

10. Net loss per common share

The calculation of basic and diluted loss per share for the year ended December 31, 2019 was based on the loss attributable to common shareholders of \$2,724,723, (year ended December 31, 2018 – \$3,148,598) and the weighted average number of common shares outstanding of 371,800,546, (year ended December 31, 2018 – 340,384,238). All outstanding options and warrants were excluded from the calculation of diluted loss per share because their effect was anti-dilutive.

11. Income taxes

The reconciliation of the combined Canadian federal and provincial statutory income tax rate of 27% (2018 – 27%) to the effective tax rate is as follows:

	2019	2018
Loss for the year, before income taxes	\$ (2,724,723)	\$ (3,148,598)
Income tax recovery at statutory rates	\$ (735,670)	\$ (850,120)
Increase (decrease) related to:		
Prior year true-up	-	192,480
Non-deductible expenses	306,310	220,480
Effect of flow-through renunciation	-	458,590
Flow-through share premium	(72,270)	(45,940)
Other	-	950
Share issuance costs booked through equity	(19,750)	(119,780)
Change in tax benefits not recognized	521,380	143,340
Provision for income taxes	\$ -	\$ -

The following table summarizes the components of deferred tax:

	2019	2018
Deferred Tax Assets		
Non-capital losses carried forward	1,155,660	1,169,920
Deferred Tax Liabilities		
Mineral Properties	(1,131,370)	(1,131,370)
Property and equipment	(24,290)	(38,550)
	-	-

Deferred taxes are provided as a result of temporary differences that arise due to the differences between the income tax values and the carrying amount of assets and liabilities. Deferred tax assets have not been recognized in respect of the following deductible temporary differences because it is not probable that future taxable profit will be available against which the Company can utilize the benefits therefrom.

Gensource Potash Corporation

Notes to Financial Statements

Years Ended December 31, 2019 and 2018

(Expressed in Canadian Dollars)

11. Income taxes (continued)

	2019	2018
Non-capital losses carried forward	\$ 16,837,330	\$ 14,586,680
Marketable securities	1,004,350	1,003,870
Net capital losses carried forward	102,280	102,280
Share issuance costs	707,650	981,780
Lease liability	113,510	159,694
Charitable donations carry forward	1,020	-

The Canadian non-capital loss carry forwards expire as noted in the table below. The net capital loss carry forward may be carried forward indefinitely, but can only be used to reduce capital gains. Share issuance and financing costs will be fully amortized in 2023. The remaining deductible temporary differences may be carried forward indefinitely.

Deferred tax assets have not been recognized in respect of these items because it is not probable that future taxable profit will be available against which the group can utilize the benefits therefrom.

The Company's Canadian non-capital income tax losses expire as follows:

2026	\$ 240
2027	4,790
2028	342,000
2029	1,877,340
2030	2,761,380
2031	1,729,570
2032	2,082,250
2033	1,733,650
2034	885,760
2035	912,440
2036	1,530,910
2037	2,231,630
2038	2,828,300
2039	2,197,280
	\$ 21,117,540

12. General and administrative

	Years Ended December 31,	
	2019	2018
Wages, benefits and incentive compensation	\$ 31,501	\$ 62,902
Sales and marketing	837,742	642,976
Professional fees (note 13)	378,462	1,252,770
Office and general	652,047	488,936
	\$ 1,899,752	\$ 2,447,584

Gensource Potash Corporation

Notes to Financial Statements

Years Ended December 31, 2019 and 2018

(Expressed in Canadian Dollars)

13. Related party balances and transactions

a) During the year ended December 31, 2019, compensation of \$660,000, (year ended December 31, 2018 - \$1,222,000) were paid to a director and officers of the Company or related companies controlled by the director and officers of the Company. The amount of \$309,000 (year ended December 31, 2018 - \$1,222,000) was included in general and administrative expenses and \$351,000 (year ended December 31, 2018 - \$nil) in exploration and evaluation assets.

b) During the year ended December 31, 2019, share-based payments of \$917,408 were rewarded to directors and officers of the Company (year ended December 31, 2018 - \$602,322).

c) To the knowledge of the directors and executive officers of the Company as of December 31, 2019, the common shares of the Company were widely held, which includes various small holdings which were owned by directors and officers of Gensource. These holdings can change at any time at the discretion of the owner.

The related party transactions were recorded at the exchange amount, which is the amount agreed to by the related parties.

14. Financial risk management

The Company's financial risk management goals are to ensure that the outcome of activities involving elements of risk are consistent with the Company's objectives and risk tolerance, while maintaining an appropriate risk/reward balance and protecting the Company's statement of financial position from events that have the potential to materially impair its financial strength. Balancing risk and reward is achieved through identifying risk appropriately, aligning risk with overall business strategy, diversifying risk, pricing appropriately for risk, mitigation through preventive controls, and transferring risk to third parties.

The long-term investment objective and strategy for the direct investment holdings remain unchanged. The short-term corporate objective and strategy may be modified to reflect global economic, financial and general market conditions, which will inevitably have an impact on the overall risk assessment of the Company. Such modifications may include, among others, streamlining operational costs, preserving cash to the extent possible, and adjusting the strategy for the disposition of securities to reflect market conditions. The Company has invested primarily in the equity securities of Canadian resource issuers. Investors are exposed to the risks and rewards of the Canadian resource sector.

The carrying value of cash, other receivables, amounts payable and other liabilities approximates fair value due to the relatively short-term maturity of these financial instruments. Fair value represents the amount that would be exchanged in an arm's length transaction between willing parties and is best evidenced by a quoted market price, if one exists.

The Company's exposure to potential loss from financial instruments relates primarily to its investment activities, and in particular, credit risk, liquidity risk, currency risk, and market risk including credit quality and equity market fluctuation risk as described below.

Credit risk

Credit risk is the risk of financial loss to the Company if a counter-party to a financial instrument fails to meet its contractual obligations; the Company's maximum exposure to credit loss is the book value of its financial instruments. The Company is not exposed to any significant credit risk as at December 31, 2019. The Company's cash is deposited with a major Canadian chartered bank and is held in highly-liquid investments.

As at December 31, 2019, the aggregate gross credit risk exposure related to cash was \$7,490,488 (2018 – \$975,158), and was entirely comprised of cash held with financial institutions with an "AA" credit rating or above and securities brokerage firms. As at December 31, 2019, the aggregate gross credit risk exposure related to receivables was \$131,164 (2018 – \$104,261) and was primarily comprised of commodity taxes receivables and other receivables.

(Expressed in Canadian Dollars)

14. Financial risk management (continued)

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they come due. All of the Company's financial liabilities are due within one year. The Company manages liquidity risk through the management of its capital structure. As at December 31, 2019, the Company had a total of \$7,490,488 in cash and \$2,293 in investments to settle liabilities of \$2,071,446.

The Company believes that its cash position and investments in marketable securities will not provide adequate liquidity to meet all of the Company's financial obligations and continue exploration activities for at least the next twelve months (see note 1). The Company anticipates to complete additional financing to improve its liquidity.

Currency risk

Currency risk is the risk that the fair value of, or future cash flows from, the Company's financial instruments will fluctuate because of changes in foreign exchange rates. The Company believes it is not significantly exposed to foreign exchange risk at this time as its business activities are denominated in Canadian currency. The Company has exposure to foreign currency risk on its US currency held in the bank. As at December 31, 2019, the Company held US\$5,394,589 of monetary assets. A 5% fluctuation in the value of the Canadian dollar would result in an increase or decrease to profit or loss of approximately \$350,325. The Company mitigates the risk of foreign currency fluctuations by converting US currency to Canadian dollars when required to fund expenditures. The Company does not currently hedge its foreign exchange risk.

Market risk

Market risk is the risk of loss arising from adverse changes in financial market rates and prices, such as interest rates, the trading price of equity and other securities, and foreign currency exchange rates. Market risk is directly influenced by the volatility and liquidity in the markets in which the underlying assets are traded. Market price fluctuations and fluctuations in the value of equity securities affect the level and timing of recognition in earnings and comprehensive earnings of gains and losses on securities held. General economic conditions, political conditions and many other factors can also adversely affect the stock markets and consequently, the value of the equity securities held.

Fair values

Set out below is a comparison, by category, of the carrying amounts and fair values of all of the Company financial instruments that are carried in the financial statements and how the fair value of financial instruments is measured.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value hierarchy establishes three levels to classify the inputs to valuation techniques used to measure fair value. Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities. Level 2 inputs are quoted prices in markets that are not active, quoted prices for similar assets or liabilities in active markets, inputs other than quoted prices that are observable for the asset or liability, or inputs that are derived principally from or corroborated by observable market data or other means. Level 3 inputs are unobservable (supported by little or no market activity). The fair value hierarchy gives the highest priority to Level 1 inputs and the lowest priority to Level 3 inputs.

Fair value hierarchy and liquidity risk disclosure

Cash and investments	Level 1	Level 2	Level 3	Total
December 31, 2019	\$ 7,492,781	\$ -	\$ -	\$ 7,492,781
December 31, 2018	\$ 977,929	\$ -	\$ -	\$ 977,929

Gensource Potash Corporation

Notes to Financial Statements

Years Ended December 31, 2019 and 2018

(Expressed in Canadian Dollars)

15. Capital management

The Company's objectives are to safeguard the Company's ability to continue as a going concern in order to support the Company's normal operating requirements, continue the development and exploration of its mineral properties and to maintain a flexible capital structure which optimises the costs of capital at an acceptable risk.

The Company manages its capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Company may issue new shares, issue new debt, acquire or dispose of assets or adjust the amount of cash and cash equivalents.

At December 31, 2019, the Company's capital structure consists of the equity of the Company. The Company is not subject to any externally imposed capital requirements. In order to maximize ongoing development efforts, the Company does not pay dividends.

16. Commitments and contingencies

i) While the Company has performed its own due diligence with respect to title of its properties, this should not be construed as a guarantee of title. The properties may be subject to prior unregistered agreements of transfer or aboriginal land claims, and title may be affected by undetected defects. If the Company defaults with respect to making payments or completing assessment work as required in order to keep its permits in good standing, the Company may lose its rights to the properties underlying such claims.

ii) The Company is party to management agreements which require that additional payments to be made upon the occurrence of change of control of 12 months of the consulting fee. As the triggering event has not taken place, the contingent payments have not been reflected in these financial statements.

17. Subsequent events

i) On January 30, 2020, the Company announced its offtake partner as HELM AG and its North American subsidiary, HELM Fertilizer Corp (together, "HELM") for the sale of 100% of the production from Tugaske. HELM and Gensource are currently finalizing the definitive offtake agreement for Tugaske under which HELM will purchase 100% of the production from the Project for 10 years, renewable thereafter. The offtake agreement is expected to be complete in Q1 of 2020.

ii) On February 10, 2020, the Company granted 300,000 options to a consultant with an exercise price of \$0.11 exercisable for 5 years. These options vest as follows: 75,000 vest immediately; 75,000 on May 10, 2020; 75,000 on August 10, 2020 and 75,000 on November 10, 2020.

iii) Since December 31, 2019, the outbreak of the novel strain of coronavirus, specifically identified as "COVID-19", has resulted in governments worldwide enacting emergency measures to combat the spread of the virus. These measures, which include the implementation of travel bans, self-imposed quarantine periods and social distancing, have caused material disruption to businesses globally resulting in an economic slowdown. Global equity markets have experienced significant volatility and weakness. Governments and central banks have reacted with significant monetary and fiscal interventions designed to stabilize economic conditions. The duration and impact of the COVID-19 outbreak is unknown at this time, as is the efficacy of the government and central bank interventions. It is not possible to reliably estimate the length and severity of these developments and the impact on the financial results and condition of the Company in future periods. Public Health crises and pandemics such as COVID-19 could limit or prohibit the conduct of exploration activities and could have a negative impact on the ability to obtain funding.
